

# Final Project Plan

## By Layton and Seth

- Platformer based off of the original doom
- You will play as doom guy, and you will shoot enemies down
  - There will be one type of enemy, but if we have extra time we will add another one
- It will follow somewhat of the same format of Mario, but basically with guns

- The enemies will shoot projectiles at you
- The player will have the option to jump, shoot, and walk, and we might add power ups if we have time
- We will write the code in py game
- We will use the sprites from the original doom game to help us.
